## Professional Summary

---

PMP-certified with 16 years building trust across federal and emergency management environments. I'm the go-to problem solver for high priority issues, the person stakeholders, leadership, and technical teams count on. I deliver on time, nearly every time, across 400+ concurrent requests. I'm now adding hands-on AI fluency: deploying an autonomous agent via Claude Code and pursuing the Claude Certified Architect - Foundations certification. Open to customer-facing or implementation roles built on trust.

## Professional Experience

---

### IT Program & Governance Coordinator

*Internal Revenue Service, U.S. Department of the Treasury | New Carrollton, MD | Dec 2017 – Sep 2025*

- Achieved 98% on-time delivery across 60+ weekly requests tied to a major federal healthcare IT program; reduced manual intake volume by 40% and improved review cycle time by 30% through process redesign.
- Managed 400+ work requests over five years with sub-24-hour average turnaround, serving as the primary point of contact for 50+ internal requestors and subject matter experts.
- Served as primary intake and governance coordinator for all technology work requests across a large IT operations division, reviewing and approving requests within a 24-hour service standard and maintaining a 100% on-time review rate.
- Designed and launched a self-service intake website, streamlining request submission and reducing manual processing for the division.
- Built and maintained a weekly workload metrics dashboard tracking 100+ active requests, project status, and resource utilization for division leadership.
- Coordinated infrastructure, storage, and database design requirements across major system releases, partnering with development teams to keep enterprise-wide projects aligned.
- Mentored and onboarded new team members into governance processes and tools.

### Emergency Management Coordinator, Disaster Recovery Detail

*Federal Emergency Management Agency (FEMA) | Orlando, FL | Oct 2017 – Dec 2017*

- Completed emergency management training and deployed to a multi-agency Joint Field Office supporting Hurricane Irma recovery efforts.
- Facilitated daily coordination meetings with federal, state, local, and tribal government representatives on cross-agency recovery issues.
- Compiled daily status reports for senior disaster recovery leadership spanning housing, infrastructure, economic, and community recovery functions.
- Built process documentation and a new issue-tracking system to improve data reporting and interagency communication.

### IT Project Manager

*Internal Revenue Service, U.S. Department of the Treasury | New Carrollton, MD | Mar 2014 – Oct 2017*

- Managed project schedules and work breakdown structures, tracking action items to closure across multiple concurrent IT infrastructure projects.
- Independently led weekly project status meetings, briefing stakeholders on schedule, risk, and resource status.
- Tracked software license compliance across enterprise IT infrastructure projects supporting a major federal healthcare IT initiative.
- Earned Project Management Professional (PMP) certification while actively managing infrastructure delivery projects.

### IT Systems Specialist (Detail Assignment)

*Internal Revenue Service, U.S. Department of the Treasury | New Carrollton, MD | Mar 2013 – Mar 2014*

- Analyzed technical specifications for enterprise IT infrastructure, including virtualized and physical servers, cloud and SAN storage, Linux/Windows operating systems, and commercial-off-the-shelf software.
- Supported infrastructure build, testing, deployment, and operations/maintenance for a major federal healthcare IT program.
- Tracked and coordinated resolution of high-priority (P1) technical issue tickets.

- Planned and monitored a major systems go-live and subsequent infrastructure releases.
- Managed software license tracking across enterprise IT infrastructure projects.

### **Program & Operations Analyst**

*Internal Revenue Service, U.S. Department of the Treasury | New Carrollton, MD | Mar 2010 – Mar 2013*

- Built executive briefing materials for monthly briefings with the organization's Chief Technology Officer; facilitated meetings, recorded minutes, and tracked action items to completion.
- Progressed from co-leading to independently leading weekly status meetings as scope of responsibility grew.
- Partnered with a specialized law-enforcement division and a real estate/facilities management group on a multi-site data center consolidation initiative, tracking cost and resource requirements and gaining working knowledge of GIS, AutoCAD, and facilities planning tools.
- Supported a national data center consolidation mandate, coordinating across technical and facilities teams.
- Recognized with a Special Act Award (2011) and an Enterprise Operations MVP Award (2012) for individual performance.

### **Student Trainee, Business Operations**

*Internal Revenue Service, U.S. Department of the Treasury | New Carrollton, MD | May 2009 – Mar 2010*

- Supported executive office operations, including meeting coordination, note-taking, and internal correspondence.
- Completed technical training in Visio and Access.

### **Education**

---

Bachelor of Arts — George Mason University, Fairfax, VA (2010)

### **Certifications**

---

Project Management Professional (PMP) — Project Management Institute, 2014

ITIL Foundations Certification, 2012

Master's Certificate in IT Project Management — George Washington University, 2012

### **Additional Skills**

---

**Relationship & Stakeholder Management:** Client relationship ownership, user adoption strategy, empathetic issue resolution, executive and field-level communication, cross-functional translation between technical and non-technical audiences

**AI Tools & Implementation:** Claude (Cowork, Claude Code, Model Context Protocol), Claude API, agentic workflow configuration, AI Fluency framework (Delegation, Description, Discernment, Diligence), Claude Certified Architect (Foundations, in progress)

**Public Sector & Public Safety:** Federal, state, local, and tribal agency coordination, disaster recovery operations (FEMA), high-stakes multi-agency communication

**Program & Workflow Tools:** MS Project, Excel, SharePoint, Notion, Agile, Change Management

**Differentiators:** Blockchain/digital asset fundamentals (Ethereum, DeFi protocols, wallet security)
